EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Kim on May 11, 2004.

2. The application has been amended as follows:

In the Claims:

Cancel claims 4, 10, and 16.

In claim 1, line 9, change "irradiating through the base" to --irradiating **light or x-rays** through the base--.

In claim 5, lines 9-10, change "irradiating through the base" to --irradiating **light or x-rays** through the base--.

In claim 11, line 10, change "irradiating through the base" to --irradiating **light or x-rays** through the base--.

Allowable Subject Matter

3. Claims 1-3, 5-9, 11-15, and 17-26 are over prior art of record allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The prior art of record neither anticipates nor renders obvious the claimed subject matter of the instant application as a whole either taken alone or in combination, in particular, prior art of record does not teach "separating the metal wires and the insulation layer from the base upon irradiating light or x-rays through the base," as recited in claims 1, "a step of separating the connection substrate from the base upon irradiating light or x-rays through the base," as recited in claim 5, "a step of separating the first base form the connection substrate upon irradiating light or x-rays through the base," as recited in claim 11, "separating the metal wires and the insulation layer from the light transmissive base upon irradiating light through the light transmissive base," as recited in claim 17, "a step of separating the connection substrate from the light transmissive base upon irradiating light through the base," as recited in claim 19, and "a step of separating the first light transmissive base form the connection substrate upon irradiating light through the base," as recited in claim 22 respectively.

Claims 2, 3, 5-9, 12-15, 18, 21, and 23-26 are also allowed as being dependent of the allowed independent base claim.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
